The Radio HF Internet Newsletter is distributed monthly, free of charge, to subscribers by e-mail. The Newsletter is a collection of web sites specifically related to radio (AM/FM, shortwave, Internet radio, amateur radio, scanning and CB), communications, telecommunications, radio memorabilia and collectibles, media, journalism, science, technology, space and astronomy, weather, transportation, plus some fun things thrown in for good measure! Each edition includes links to web sites submitted by subscribers or by the editor. All sites are reviewed, verified and presented to you, with the URL, and a brief description of each site.

The Newsletter arrives in your in-box as an easy to read e-mail; no complicated attachments, and no fear of viruses. The Newsletter is distributed to over 1500 subscribers. The subscriber list is secure, private and confidential. It will never be sold, redistributed or displayed.

Subscribers are encouraged to send along web sites for inclusion in future editions of the Newsletter. All contributors whose sites are published will receive a 2% discount on their next purchase from Radio H.F. The e-mail address for all contributions, comments, and subscription requests is hfnewsletter@yahoo.com mailto:hfnewsletter@yahoo.com

Welcome to the June issue the Radio HF Newsletter. It's beginning to look like the second week of each month is the more likely completion time for this Newsletter. Once again, the time has gone by very quickly over the last 30 days so you are receiving this edition late again.

If you are a sports fan, there has and will be a lot going on. The Stanley Cup hockey series is just about to wrap up. The NBA finals are underway. Wimbledon will be coming up shortly, as well as the U.S. Open golf tournament. Of course, major league baseball is on-going. The focus of much of the world over the next 30 days or so will be on the 2014 World Cup (Soccer) tournament is just kicking off in Brazil. I'll include a link or two for it in this month's edition.

Meanwhile, Darlene and I completed our 2014 Baillie Birdathon finally reaching that desired goal of 100 species in a day. We completed the event on May 20th. Our previous single-day record was 96 species back in 2007. This year we reached 100 species exactly. Unfortunately though this was our lowest amount of donations raised since beginning the activity back in 2003. I'd like to publicly thank the following Radio HF Internet subscribers who came through with donations to our Birdathon this year:
Andrew Foot, Claude Beaupré, Daniel Sangster, Donald Schimmel, Douglas Copeland, Gary Thorburn, Gary Donnelly, Harold Cones, John Fisher, John Grow, Ken Miller, Robert Thomassin, Robert MacKenzie, Stephen Powell, Vernon Ikeda, Brian Penney, and William Ellis.
Thank you all for your generous support. It is greatly appreciated.

For the rest of you, it's not too late to donate whatever amount possible directly through our 2014 Baillie Birdathon webpage at
http://birdscanada.kintera.org/birdathon/harvey
http://birdscanada.kintera.org/birdathon/harvey. Just click on the "Give Now" icon. You can make your payment by credit card or PayPal, or by sending a cheque, payable to Bird Studies Canada to my Radio HF mailing address.

Our Monthly Special Zone for June features web pages on the FIFA World Cup, Men's Health Month, Nature Photography Day, World Blood Donor Day, and the U.N.'s World Refugee Day.

This month's virtual voyage around the world, in the "Where in the World Zone", takes us to South America where the attention of so much of the world's sports fans will be focused on the FIFA World Cup. We head to
Brazil. Officially the Federative Republic of Brazil, it is the largest country in both South America and the Latin American region. It is the world's fifth largest country, both by geographical area and by population. It is the largest Portuguese-speaking country in the world, and the only one in the Americas. Bounded by the Atlantic Ocean on the east, Brazil has a coastline of 7,491 km (4,655 mi). It is bordered on the north by Venezuela, Guyana, Suriname and French Guiana; on the northwest by Colombia; on the west by Bolivia and Peru; on the southwest by Argentina and Paraguay and on the south by Uruguay. Numerous archipelagos form part of Brazilian territory, such as Fernando de Noronha, Rocas Atoll, Saint Peter and Paul Rocks, and Trindade and Martim Vaz. It borders all other South American countries except Ecuador and Chile and occupies 47 percent of the continent of South America.

Let's get on to this month's links.

RADIOWAVZ

Radiowavz, of Lake St. Louis, Missouri, is a unique manufacturer of radio antennas. The most important element in radio communications is the antenna. You may have great equipment and a powerful transmitter, but without the correct antenna, contacts will be marginal, if not impossible. RadioWavz has developed a line of expertly engineered products to fit your needs and provide great results.
Radiowavz offers high quality types of antennas such as dipoles, double bazookas, off-center fed dipoles, G5RVs, end fed, near vertical incidence skywave systems, broadband, as well as baluns and coax switches. For helping you to string up the long antennas, they offer the truly unique Hyper-Hanger. Check it out together with all the other Radiowavz products on their webpage

I have been reviewing the whole series of 100th Anniversary publications that have come out of the ARRL in recent months, but I have to say, as good as they have all been, this one is my personal favorite!
When I was a young, newly minted ham, I was a poor college student with very limited pocket money, but that didn’t stop me from pouring over the ads in the back of QST and dreaming of the station I might someday have. I probably spent more time looking at the ads and dreaming of “some day” than I did reading the article. I’m guessing that young hams going all the way back to QSTs first issues did much the same. I can imagine a kid trying to figure out how he was going to raise 12 buck on his paper route to get a Mesco Rotary Spark Gap to put him on the air in high style. This book takes you from those days of Spark Gaps and Crystal Detectors up to the current Digital Communications tools and SDR based transceivers. It is a complete, exhaustive history of ham radio tools and toys. The Old Timer will look at this book and point out the gear they used to use. The new ham will see how far we’ve come and how this hobby remained great for 100 years an counting, Everybody will have their favorite era to examine in detail. Some folks will even marvel at the original cost of gear that is now highly prized by collectors. Have you priced an Ameco AC-1 recently??? This companion volume to Volume 1: Amateur Radio Technology is a worthy addition to any serious student of amateur radio or anybody who just wants to dream again about the many great developments in the greatest hobby

in the world!

This publication is available from ARRL or from your favourite radio and communications publications retailer, including Radio HF (ed.)
